“I work really hard to participate in class and get good grades because I feel a certain stigma is associated with having kids while still in college. I want to prove that just because I chose a different path than most, I can still have a successful career.” - M.M.

“Being an adult student is an experience I could have never imagined. I have earned the respect and admiration of the other students and teachers see me as someone who is honestly passionate about her career of choice. I love school, and I love that I am appreciated for who I am, and what experiences I can share with others.” - S.R.
